BSIE 5-N

Problem: Problem Solving

Input: Problem, knowledge, pen and paper

Process: Writing the problem, analyzing and answering the problem

Output: Answer to the problem

Step 1: Start by writing the problem on the sheet of paper

Step 2: analyze the problem

Step 3: Is the problem solvable by what was discussed?

- Yes- Use the knowledge you have to create an answer
- No- Find another formula to use and repeat step 2

- Is the answer correct?
 - Yes- write and End
 - No- repeat step 2
